## Mounting Suggestions

When mounting the Pet Palace bag to the passenger seat, Kuryakyn recommends securing the bag to the passenger footpeg mounts (if mounts are stationary), backrests or the frame with the Adjustable Straps with Clips. Be sure the mounting straps **DO NOT** interfere with the safe operation of your motorcycle. **DO NOT** secure the Pet Palace Bag to the swingarm or any other part that moves independently from the seat. Secure the bag by hooking the straps to both the top and bottom D-rings. Route the straps around each side of the backrest support and then route the other two straps around each side of the luggage rack. If you do not have a backrest, hook the bag to other secure tie-down points. The bag must be secured in all four corners. To mount the Pet Palace to the luggage rack, Kuryakyn recommends using the adjustable straps connected to the top D-rings on the Pet Palace bag and securing the bag directly to the luggage rack tubing. Using the top D-rings will provide added stability when loaded with a pet and will make mounting easier with the longer straps.

**ATTENTION!** Connect the animal to the leash located inside the Pet Palace while the bike is in motion. Adjust the leash to limit the pet's movement and keep the animal from jumping from the bag. It is the riders responsibility to make sure the bag is fastened securely to the motorcycle every time before riding. Check straps for wear before every use.

**WARNING!** THE BAG MUST BE SECURED IN ALL FOUR CORNERS AND MUST FIT TIGHT TO THE MOTORCYCLE. ALL FOUR STRAPS MUST BE CONNECTED SECURELY WITH EXCESS OF THE STRAPS TIED OFF OR TUCKED-IN SECURELY. FAILURE TO FOLLOW THESE INSTRUCTIONS OR IMPROPER USE OF THIS BAG MAY RESULT IN THE BAG FALLING OFF THE BIKE OR LOOSE STRAPS BECOMING ENTANGLED IN MOVING PARTS OF THE MOTORCYCLE CAUSING LOSS OF CONTROL AND RESULTING IN SERIOUS INJURY TO THE PET AND/OR RIDER.

**WARNING!** RECOMMENDED APPROXIMATE WEIGHT CAPACITY IS 20 POUNDS OR LESS. ALWAYS FOLLOW MANUFACTURE'S RECOMMENDATIONS ON YOUR LUGGAGE RACK OR TOUR-PAK FOR LOAD LIMITS. LOAD ONLY IN COMPLIANCE WITH YOUR VEHICLE OWNER'S MANUAL.

**BEFORE USE:** make sure your pet tolerates confinement in Pet Carrier. **Pet must be completely inside Pet Carrier** and all "mesh" openings must be fully zipped closed while motorcycle is moving. If pet has any part of its body outside Pet Carrier while motorcycle is moving, you and/or your pet could be seriously injured or killed should pet fall or jump from Carrier. An adjustable leash is provided to attach pet's collar to D-rings inside Carrier. Attachment of the leash does not prevent or lessen the likelihood of injury or death if used while the motorcycle is moving. It is very important that you adjust the leash to minimize pet's movement, to avoid entanglement and to prevent pet from jumping from the pet carrier. If proper adjustment is not made and the leash is too long, the pet may jump or fall out of bag resulting in serious injury to the pet or death by hanging from the leash.

**CAUTION!** Avoid suffocation by always leaving at least one solid window covering partially unzipped to allow ventilation and fresh air in through the zipped mesh window. Never leave the pet unattended in the carrier.

**Safety Tip:** **Pets chew!** Always thoroughly check your pet carrier and leashes for pet damage before each ride. This pet carrier is not intended as a protective device. **Kuryakyn assumes no liability** for any injury or death to rider and/or pet arising from use of this product.

**Mounting Tips:** The Pet Palace bag must rest on either a luggage rack or passenger seat and be securely tied down. You must use all four straps to secure bag. It is very important that you inspect all straps before and after every use to make sure all straps are in working order. The bag should be secured using a 4 point tie down system. Secure the bags by hooking the straps to both the top and bottom d-rings on the bag. Route a strap around each side of the backrest support and then route the other two straps around each side of the luggage rack. If you do not have a backrest, hook bag to other secure tie down points. The bag must be secured in all four corners. Make sure the tie down points you choose are stationary and do not allow the straps to move and loosen up while riding. Each strap must be hooked independently to insure stable mounting. Once bag is in place and all straps are attached, tighten all straps so bag is attached securely and cannot move around. All loose ends of straps must be tucked in or tied off to avoid entanglement in moving parts of the motorcycle and to prevent paint damage caused from flapping straps.

**ATTENTION!** It is the rider's responsibility to make sure the bag is mounted tight with all straps tied off before riding. With bag attached to the motorcycle, grab bag on both sides and test it to make sure all straps are secure and bag does not move. All Kuryakyn bags come with an instruction sheet. Do not use this bag without reading and properly understanding all of the instructions.

**WARNING!** THE BAG MUST BE SECURED IN ALL FOUR CORNERS AND MUST FIT TIGHT TO MOTORCYCLE. ALL FOUR STRAPS MUST BE CONNECTED SECURELY WITH EXCESS OF STRAP TIED OFF OR TUCKED IN SECURELY. FAILURE TO FOLLOW THESE INSTRUCTIONS OR IMPROPER USE OF THIS BAG MAY RESULT IN THE BAG FALLING OFF THE BIKE OR LOOSE STRAPS BECOMING ENTANGLED IN MOVING PARTS OF THE MOTORCYCLE CAUSING LOSS OF CONTROL AND RESULTING IN SERIOUS INJURY OR DEATH TO THE PET AND/OR RIDER.

**ATTENTION!** Kuryakyn Holdings, LLC. issues no warranty and assumes no liability for damage caused by use of this product other than as recommended. Recommended approximate weight capacity is 20 pounds or less. Always follow manufacturer's recommendations on your luggage rack or Tour-Pak for load limits. Load only in compliance with your vehicle owner's manual.
